Fluorescence Spectroscopy

New Methods and Applications

With contributions by numerous experts

1993. XX, 320 pp. 176 figs. 9 tabs. Hardcover DM 168,-
ISBN 3-540-55281-2

Fluorescence spectroscopy has found wide spread application in many fields of science and medicine - including physics, chemistry, biology, biochemistry, clinical medicine, cytology, immunology, hydrogeology, and environmental sciences. The book is divided into chapters on new methods, new applications, fluorescence immunoassays, fluorometric analysis and fluorescence spectroscopy in biomedical sciences and presents recent applications of and new developments in fluorescence spectroscopy written by experts in the field.
