

ANNOUNCEMENT

**3RD INTERNATIONAL SYMPOSIUM ON CLATHRATE
COMPOUNDS AND MOLECULAR INCLUSION PHENOMENA**

2ND INTERNATIONAL SYMPOSIUM ON CYCLODEXTRINS

will be held on *July 23–27, 1984*, in *Tokyo, Japan*, by the Japan Association for Inclusion Chemistry.

Major topics covered will be the chemistry of compounds and phenomena of inclusion and intercalation on Cyclodextrins and Natural Host Compounds; Synthetic Organic Hosts such as Crowns, Cryptands, Cyclophanes; Inorganic and Metal Complex Hosts; Layered Compounds from the view-points of: Application in Catalysis, Food Science, Materials Science, Pharmaceutics, etc.; Biomimetic Aspects; Kinetics and Thermodynamics; Physicochemical Aspects; Selectivity and Separation; Stereospecificity and Structure; Strategy in Synthesis;

Invited lectures with relevant topics are planned. Owing to time and space limitations, the number of contributed papers which can be presented orally may be limited. There will be poster presentations.

A number of social events and general interest programs including those for accompanied members will be planned.

Those who are interested in receiving information in detail are requested to refer to:

Professor Toschitake Iwamoto,
General Secretary of IIMIP-IICD,
Department of Chemistry,
College of Arts and Sciences,
The University of Tokyo,
Komaba, Meguro,
Tokyo 153, Japan.

Those who have already sent preregistration forms to the Organizing Committee will receive the Second Circular by January 1984.

A group travel programme can be organised for the conference if sufficient people are interested. Anyone interested in joining this tour is asked to contact:
