

INFORMATIONS

1. – INTERNATIONAL SYMPOSIUM ON EARTH GRAVITY MODELS AND RELATED PROBLEMS

August 16–18, 1972
Saint Louis, Missouri, U.S.A.

Sponsored by **The American Geophysical Union** in cooperation with
The International Association of Geodesy
The Interunion Commission on Geodynamics

Organized by the Metropolitan Saint Louis Regional Branch of the
American Geophysical Union—William P. Durbin, Chairman

FIRST ANNOUNCEMENT

A program committee has been established to form a coherent program of invited and contributed papers in topic areas of interest to those attending this symposium. In considering papers for this symposium, two broad categories will be established :

- Papers related to the description and determination of the external gravitational field of the earth. Topics in this area may range from new techniques for the modeling of the external field to applications of forthcoming techniques to current numerical values of potential coefficients ; and
- Papers dealing with the use of our knowledge of the external gravity field and related data in the modeling of the interior of the earth.

The Program Committee

Professor Richard Rapp, Chairman
Professor Karl Koch
Professor George D. Garland
Professor William M. Kaula

It is anticipated that a representative of the Standard Earth Model Committee of IASPEI and a representative of the Interunion Commission on Geodynamics will be added to this committee.

Deadline for receipt of titles—February 28, 1972

Deadline for receipt of abstracts—May 30, 1972

Completed manuscripts should be received not later than August 14, 1972. Plans call for provision of copying facilities as the meeting for distribution of the papers to interested participants.

Send titles, abstracts, and papers to :

**International Symposium on Earth Gravity Models
and Related Problems**

American Geophysical Union
2100 Pennsylvania Avenue, N.W.
Washington, D.C. 20037, U.S.A.

**2. — INTERNATIONAL SYMPOSIUM ON COMPUTATIONAL METHODS IN
GEOMETRICAL GEODESY**

Date and Place

At the invitation of the Royal Society, the International Association of Geodesy will hold an International Symposium on Computational Methods in Geometrical Geodesy at the University of Oxford from 2 to 8 September 1973.

Organizing Committee

Chairman : Dr. A.R. Robbins

Scientific Secretary : Dr V. Ashkenazi

Administrative Secretary : Mr J.G. Olliver

Treasurer : Miss L.M. Windsor

Mr C.R. Argent

Major—General R.C.A. Edge

Mr J.K. Holt

Mr J.A. Weightman
