

# Addenda

In Vol. 15, No. 5, p. 544 of "The Al-B (Aluminum-Boron) System" by H. Duschaneck and P. Rogl, a printer error resulted in the placing of only the inset to the phase diagram being placed in the assessed phase diagram figure box. The full Assessed Al-B phase diagram with inset is correctly shown here. Also in this evaluation, in Table 3 on page 545, a slash was incorrectly added to the units listed in the second half of the table. The correct unit is  $\text{gm}^{-3}$ , not  $\text{g/m}^{-3}$ . A decimal point was inadvertently moved in that table so that the value attributed to [77Kas] was given as  $26.5(8) \times 10^6 \text{ gm}^{-3}$ , rather than correctly as  $2.65(8) \times 10^6 \text{ gm}^{-3}$ . We regret these errors.
