

Erratum

The editors apologize for wrong numbering in the determination key (p. 331) in the paper by HODALOVÁ I. (1999): *Senecio ucranicus* (*Compositae*), a new species from the Carpathians. *Folia Geobot.* 34: 321–335. The correct numbering is as follows:

- 1a. Supplementary bracts glandulous 2
- b. Supplementary bracts hairy with short or long articulate hairs (not glandulous) 4

- 2a. Involucral bracts 6–12 mm; supplementary bracts 7–14 mm, longer, or as long as involucre; tubular florets 12–30, 8–11 mm; West Carpathians, southern part of the South Carpathians and Apuseni Mts. 3
- b. Involucral bracts 5–8 mm; supplementary bracts 2–4 mm, much shorter than involucre; tubular florets 8–14, 7–9 mm; East Carpathians and eastern part of the South Carpathians *S. ucranicus*
