

INDEX

Volume 53

Authors of Articles

- Alfano, Salvatore *A Numerical Implementation of Spherical Object Collision Probability*, 103–109.
- Alfano, Salvatore *Relating Position Uncertainty to Maximum Conjunction Probability*, 193–205.
- Alfriend, Kyle T. *see* Carpenter and Alfriend, 207–219.
- Bainum, Peter M. *see* Duan and Bainum, 65–82.
- Bernelli-Zazzera, Franco. *see* Topputo, Vasile, and Bernelli-Zazzera, 353–372.
- Breckenridge, William G. *see* Mettler, Breckenridge, and Quadrelli, 391–412.
- Carpenter, J. Russell and Alfriend, Kyle T. *Navigation Accuracy Guidelines for Orbital Formation Flying*, 207–219.
- Carter, David W. *see* Cefola, Draim, Inciardi, Proulx, and Carter, 111–129.
- Cefola, Paul, Draim, John E., Inciardi, Richard, Proulx, Ronald J., and Carter, David W. *The Orbital Perturbation Environment for the COBRA and COBRA Teardrop Elliptical Constellations*, 111–129.
- Chakravorty, Suman, Kabamba, Pierre T., and Hyland, David C. *Modeling of Image Formation in Multi-Spacecraft Interferometric Imaging Systems*, 281–300.
- Cheng, Yang and Shuster, Malcolm D. *QUEST and The Anti-QUEST: Good and Evil Attitude Estimation*, 337–351.
- Codrescu, M. V. *see* Minter, Fuller-Rowell, and Codrescu, 445–463.
- Draim, John E. *see* Cefola, Draim, Inciardi, Proulx, and Carter, 111–129.

- Duan, Xiaodong and Bainum, Peter M. *Low-Thrust Autonomous Control for Maintaining Formation and Constellation Orbits*, 65–82.
- Ely, Todd A. *Stable Constellations of Frozen Elliptical Inclined Lunar Orbits*, 301–316.
- Fuller-Rowell, T. J. *see* Minter, Fuller-Rowell, and Codrescu, 445–463.
- Gómez, G., Marcote, M., Masdemont, J. J., and Mondelo, J. M. *Zero Relative Radial Acceleration Cones and Controlled Motions Suitable for Formation Flying*, 413–431.
- Griffith, D. Todd, Turner, James D., and Junkins, John L. *Automatic Generation and Integration of Equations of Motion for Flexible Multibody Dynamical Systems*, 251–279.
- Hurtado, John E. *see* Sinclair and Hurtado, 317–335.
- Hussein, Islam I. and Scheeres, Daniel J. *Effects of Orbit Variations and J_2 Perturbations on a Class of Earth-Orbiting Interferometric Observatories*, 147–166.
- Hyland, David C. *see* Chakravorty, Kabamba, and Hyland, 281–300.
- Inciardi, Richard. *see* Cefola, Draim, Inciardi, Proulx, and Carter, 111–129.
- Junkins, John L. *see* Griffith, Turner, and Junkins, 251–279.
- Kabamba, Pierre T. *see* Rao and Kabamba, 167–183.
- Kabamba, Pierre T. *see* Chakravorty, Kabamba, and Hyland, 281–300.
- Kay-Bunnell, Linda. *see* Roithmayr and Kay-Bunnell, 131–146.
- Ketema, Yohannes *An Analytical Solution for Relative Motion with an Elliptic Reference Orbit*, 373–389.
- Kim, Jae-Hoon. *see* Lee, Lee, and Kim, 1–19.
- Lee, Byoung-Sun, Lee, Jeong-Sook, and Kim, Jae-Hoon *Long-Term Evolution of the KOMPSAT-1 Orbit*, 1–19.
- Lee, Jeong-Sook. *see* Lee, Lee, and Kim, 1–19.
- Marcote, M. *see* Gómez, Marcote, Masdemont, and Mondelo, 413–431.
- Masdemont, J. J. *see* Gómez, Marcote, Masdemont, and Mondelo, 413–431.
- Mazanek, Daniel D. *see* Park and Mazanek, 21–37.

- Mettler, Edward, Breckenridge, William G., and Quadrelli, Marco B. *Large Aperture Space Telescopes in Formation: Modeling, Metrology, and Control*, 391–412.
- Minter, C. F., Fuller-Rowell, T. J., and Codrescu, M. V. *The Potential of Remote Sensing for Neutral Atmospheric Density Estimation in a Data Assimilation System*, 445–463.
- Misra, A. K. *see* Wong and Misra, 221–250.
- Mondelo, J. M. *see* Gómez, Marcote, Masdemont, and Mondelo, 413–431.
- Mukherjee, Ranjan and Shuster, Malcolm D. *A Simple Derivation of the Gauss-Bonnet Theorem*, 185–191.
- Park, Sang-Young and Mazanek, Daniel D. *Deflection of Earth-Crossing Asteroids/Comets Using Rendezvous Spacecraft and Laser Ablation*, 21–37.
- Piper, George E. and Watkins, John M. *Investigating the Effects of Cross-Link Delays on Spacecraft Formation Control*, 83–101.
- Proulx, Ronald J. *see* Cefola, Draim, Inciardi, Proulx, and Carter, 111–129.
- Quadrelli, Marco B. *see* Mettler, Breckenridge, and Quadrelli, 391–412.
- Ramachandran, Rahul. *see* Tan and Ramachandran, 39–50.
- Rao, Venkatesh G. and Kabamba, Pierre T. *MixTeam Scheduling Algorithms: Application to Space-Based Interferometric Observatories*, 167–183.
- Roithmayr, Carlos M. and Kay-Bunnell, Linda *Keeping a Spacecraft on the Sun-Earth Line*, 131–146.
- Scheeres, Daniel J. *see* Hussein and Scheeres, 147–166.
- Shuster, Malcolm D. *see* Mukherjee and Shuster, 185–191.
- Shuster, Malcolm D. *see* Cheng and Shuster, 337–351.
- Sinclair, Andrew J. and Hurtado, John E. *Minimum-Parameter Representations of N-Dimensional Principal Rotations*, 317–335.
- Tan, Arjun and Ramachandran, Rahul *Velocity Perturbations Analysis of the Spot 1 Ariane Rocket Fragmentation*, 39–50.
- Topputo, Francesco, Vasile, Massimiliano, and Bernelli-Zazzera, Franco *Low Energy Interplanetary Transfers Exploiting Invariant Manifolds of the Restricted Three-Body Problem*, 353–372.

- Tragesser, Steven G. and Tuncay, Ayhan *Orbital Design of Earth-Oriented Tethered Satellite Formations*, 51–64.
- Tuncay, Ayhan. *see* Tragesser and Tuncay, 51–64.
- Turner, James D. *see* Griffith, Turner, and Junkins, 251–279.
- Vasile, Massimiliano. *see* Topputo, Vasile, and Bernelli-Zazzera, 353–372.
- Watkins, John M. *see* Piper and Watkins, 83–101.
- Wong, B. and Misra, A. K. *Dynamics of Lagrangian Point Multi-Tethered Satellite Systems*, 221–250.
- Xu, Yunjun *Sliding Mode Control and Optimization for Six DOF Satellite Formation Flying Considering Saturation*, 433–443.
