Intensive Care Med (2003) 30:51–61

Due to an unfortunate error the second sentence in the
second paragraph of “Discussion/Occurrence of acute
lung injury and acute respiratory distress syndrome in

intensive care units” was published incorrect. We here-
with publish the correct sentence:

We found that about 30% of patients presented with
the mild form of ALI, but that a minority of these (45.6%)
did not evolve to ARDS.
