

## ERRATUM

---

“**T**he Volume-Outcome Relationship: Don’t Believe Everything You See”. *C. Christian et al.* (DOI: 10.1007/s00268-005-7993-8)

In the October 2005 publication of the above-referenced article, volume 29, issue 10, the authors have identified an error in their calculations. In two places

on page 1243 they provide an example of a procedure with a mortality rate of 0.7%. In truth, the correct mortality rate for this example is 6%, when calculated correctly. This error in calculation does not affect the applicability of the example case or the conclusions of the article.
