

## Thanks to Our Reviewers 2021!

© Springer-Verlag GmbH Austria, part of Springer Nature 2022

We would like to have all contributions submitted to the journal reviewed rigorously and fairly. At the same time, our desire is to have reviews done in reasonable time, although this is strictly linked to the quality of the submission. The objective is to produce high-quality papers, which benefit the journal but, most importantly, benefit the authors. In 2021, our journal has received more than 1300 manuscripts, including original papers, review papers, and technical notes that have been reviewed to assess whether they merit publication. In addition, our journal in the same year has published two Special Issues. This was only possible based on the work of the editorial board. It is clear, however, that we needed to rely as well on the voluntary help of many people who devoted their time to the journal. We gratefully acknowledge the valued support of all these people who have reviewed manuscripts for Rock Mechanics and Rock Engineering in 2021!
