Correction to: Theoretical and Applied Climatology (2021) 148:441-454

<https://doi.org/10.1007/s00704-021-03907-3>

In this article the footnote in Table 4 was missing. This footnote should contain the following information:

$a = \text{Total score} = (\text{Frequency} + \text{Area Impact}) \times \text{Magnitude}$

* Values 1-5 denote the strength levels, with 1 representing the lowest and 5 the highest.

** If scores are tied, priority selection is based on the following criteria: 1. Magnitude, 2. Frequency, 3. Area Impact.

The original article has been corrected.
