Unfortunately in the original version of the above article, CQ 13 was processed incorrectly.

CQ 13 has been corrected with this erratum.

CQ 13. Should ADPKD patients with ESRD undergo hepatic transarterial embolization to reduce hepatomegaly?

Recommended Grade: C1

Hepatic transarterial embolization in ADPKD patients with ESRD is effective in reducing hepatomegaly and is therefore recommended.

The online version of the original article can be found under doi:[10.1007/s10157-015-1219-7](https://doi.org/10.1007/s10157-015-1219-7).
