Erratum to: J Plant Res
DOI 10.1007/s10265-009-0262-4

By mistake, the micrograph for Fig. 1e was also used for Fig. 5e. The correct micrograph for Fig. 5e is shown below.

An erroneous description was given in the third paragraph of the section “Analysis of aneuploidy transmission in tetraploid *asy1*” under “Results”. The second sentence of this paragraph should read:

Chromosome counting indicated that about 90% of the backcrossed seeds analyzed have an increased or reduced number of chromosomes when tetraploid *asy1* was the pollen recipient, and about half of these seeds show a gain of chromosomes.
