Erratum to: AIDS Behav DOI 10.1007/s10461-016-1424-8

Unfortunately, the online published article has errors in Table 4. The sample size for the analyses presented in Table 4 is 62 (not 63) as one outlier reporting 180 condomless anal sex partners was excluded. The correct Table 4 is given in the following page.

Table 4 Hierarchical linear multiple regression predicting number of condomless anal sex partners among HIV-negative and positive transgender women, $N = 62$

Predictor variable	<i>B</i>	<i>p</i>	<i>R</i> ²	ΔR^2	ΔF	<i>p</i>
Step 1						
Age	0.03	.69	.011	-.045	0.20	.90
Education	0.43	.77				
Income	0.77	.61				
Step 2						
Structural barriers	0.51	.001	.201	.190	12.39	.001

Excludes outlier reporting 180 condomless anal sex partners
