**Correction to: Behavior Genetics (2021) 51:580–591**  
<https://doi.org/10.1007/s10519-021-10066-8>

In the original article, we reported parameter estimates from a conditional multilevel growth curve model (Table 3). The intercept and slope estimates were mistakenly reported as within-person parameters, when they in fact vary between persons and families. The corrected table is presented below. Parameters are listed as either fixed (i.e., mean) effects or random (i.e., varying) effects. All estimates are the same as those reported in the original article, and our conclusions are unchanged.

**Table 3** Key parameter estimates from conditional multilevel growth curve model of ASB development

Parameter	Estimate	S. E.	<i>p</i> -value
<i>Fixed effects (means)</i>			
<b>Intercept</b>	<b>0.667</b>	<b>0.069</b>	<b>&lt; 0.001</b>
<b>Slope</b>	<b>−0.018</b>	<b>0.007</b>	<b>0.010</b>
<b>ADI → intercept</b>	<b>0.004</b>	<b>0.001</b>	<b>&lt; 0.001</b>
<b>Sex → intercept</b>	<b>0.170</b>	<b>0.032</b>	<b>&lt; 0.001</b>
Ethnicity → intercept	−0.035	0.054	0.518
<b>ADI → slope</b>	<b>−0.0002</b>	<b>(0.000)</b>	<b>0.001</b>
<b>Sex → slope</b>	<b>−0.008</b>	<b>0.003</b>	<b>0.016</b>
Ethnicity → slope	0.001	0.006	0.900
<i>Random effects (variances)</i>			
<b>Intercept</b>	<b>0.179</b>	<b>0.015</b>	<b>&lt; 0.001</b>
<b>Slope</b>	<b>0.001</b>	<b>0.000</b>	<b>&lt; 0.001</b>
<b>Intercept-slope covariance</b>	<b>−0.010</b>	<b>0.001</b>	<b>&lt; 0.001</b>
<b>Residual variance</b>	<b>0.152</b>	<b>0.006</b>	<b>&lt; 0.001</b>

*Note.* Bold font indicates that the estimate was significantly different than zero at  $p < .05$ . Questionnaire type was included as a random, time-varying covariate
