Transport efficiencies of momentum and scalars under stable (*left panels*) and unstable (*right panel*) conditions at 47 m (*bottom panel*), 140 m (*middle panel*) and 280 m (*top panel*). The *vertical error bars* denote the standard deviation within each bin. The *solid lines* are fitted functions from Bruun et al. (1993); the *dashed lines* are fitted functions from Quan and Hu (2009) and the *dotted lines* are fitted functions from Wood et al. (2010). The *black dots* denote u ; the *red diamonds* denote T ; the *blue squares* denote q and the *green dots* denote CO_2 .
