**Correction to:** Int Ophthalmol  
<https://doi.org/10.1007/s10792-018-0938-7>

In the original publication, introduction section under Abstract was published incorrectly. The correct version is given below.

*Introduction* Pigment dispersion syndrome (PDS) is a condition where anomalous iridozonular contact leads

to pigment dispersion throughout the anterior segment and the released pigment is abnormally deposited on various ocular structures.

The original article has been corrected.
