In Figure 1 of this article, the chromosome numbers were wrongly indicated as XI (11) and XII (12). These should be IX (9) and X (10) as Maize has only 10 chromosomes. The authors thereby making this note to correct Fig. 1 as shown.

**Fig. 1** Locations of the different *ZmZIP* genes in the maize genome. Roman number indicated different chromosomes of maize and figure in parentheses indicate the position of the gene in Mb
