Acknowledgements

The authors want to thank Patuakhali Science and Technology University (PSTU), Dumki, Patuakhali-8602, and Dhaka University in Bangladesh for sample processing, as well as Yokohama National University in Japan for arsenic analysis. The authors extend their appreciation to the Deanship of Scientific Research at King Khalid University for funding this work through Large Group Research Project under grant number 39/43 and the Research Center for Advance Materials (RCAMS) at King Khalid University, Saudi Arabia for their valuable technical support.

Publisher's note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
