

PETER SARNAK

We dedicate this volume of the Journal d'Analyse Mathématique to celebrate Peter Sarnak's 70'th birthday.

Peter Sarnak was born on December 18, 1953 in South Africa. He received his PhD in 1980 from Stanford, was a faculty member at NYU, Stanford and is currently on the faculty of Princeton University and the Institute for Advanced Study.

Peter is known for his seminal contributions to Number Theory, Quantum Chaos and Combinatorics. His work has energized these fields and has generated a multitude of subsequent research works. This volume includes several contributions in areas related to his work.
