Correction to: Estimation of treatment preference effects in clinical trials when some participants are indifferent to treatment choice

Stephen D. Walter^{1*}, Robin M. Turner², Petra Macaskill³, Kirsten J. McCaffery³ and Les Irwig³

Correction to: BMC Med Res Methodol

<https://doi.org/10.1186/s12874-017-0304-x>

In the original publication of this article [1], there is a small calculational error in the illustrative example. The estimated second preference contrast $\Delta\pi'$ should be -3.23, not -0.49 as shown. All the other numerical results in the example are shown correctly. This change does not materially affect the substantive interpretation of the analysis.
