

**Article Corrected**

Bond GR, Ho M, Woodward RW. Trends in hepatic injury associated with unintentional overdose of paracetamol (acetaminophen) in products with and without opioid: an analysis using the National Poison Data System of the American Association of Poison Control Centers, 2000–7. *Drug Safety*. Epub 2011 Dec 13. doi: 10.2165/11595890-000000000-00000

A Published-Ahead-of-Print version of this article was made available online at <http://adisonline.com/drugsafety/toc/publishahead> on 13 December 2011. An error was subsequently identified by the authors in that version of the article, and the following correction has therefore been made:

**Correction Made****Page 2: Abstract Results section, paragraph 3, sentence 2:**

The following sentence, which previously read:

“A total of 4674 patients (3.7%) experienced some hepatic injury (44% increase).”

has now been corrected as follows:

“A total of 4674 patients (3.7%) experienced some hepatic injury (134% increase).”

**Note**

All online versions of this article have been updated to reflect this correction.
